CGEST in the Community

Dr. Tara Nkrumah, the lead of CGEST, recently participated in the Gathering for the “Celebration of Women” at the University of Arizona. During the meeting set goals. Participants met from various organizations to advance women of color and/or leadership in the state of Arizona. Some of the meeting topics included building networks and attracting new participants.

CGEST staff acted as Spect-Actors to the many groups - purpose-CRG’s mission and enact bias. CGEST staff and members expressed how beneficial the session was for them to experience being in this situation. The ASC CREATE on Wheels staff for interacting with CompuPower students during their outreach field trips.

Each of the staff members expressed how beneficial the session was for them to experience being in this situation. The ASC CREATE on Wheels staff for interacting with CompuPower students during their outreach field trips.

ASC staff. Thank you to Dr. Nkrumah for leading the course but this time for the entire session.

Importance of CRS in all STEM settings. Dr. Nkrumah’s Blog

The importance of CRS in all STEM settings

Alyssa is interested in learning about alternative life options. With a passion to make an impact on the current generation young girls so they know of some other disparities in the world outside of girls in tech. She was attracted to CGEST because the Center specializes in researching women, doctors that will listen to their concerns.
