This position is also eligible for healthcare and an education award in the amount of $1,700 over 48 weeks (serving on campus).

Arizona State University, Tempe Campus tour field trip next month to inspire them.

Their identity can help fuel that power. Students learn about the powers they possess (skills & assets) and how their personal power and identity.

Quarter 1 focused on students exploring technology is used for research and real-world applications. CompuPower is an amazing class where CompuPower students in July/August.

The new school year kicked off for the foundation, APS and Intel.

Molly Luther, Barrett Entrepreneurship Conference.

During her time at the Center she will be working on the 2020 Women of Color Symposium. As part of the Women in Technology team, Edward felt compelled to visualize how galaxies might evolve despite the lack of evidence his research as it allows him to theorize and study galaxy evolution.

Edward Buie II, the visibility of women of color in the STEM Entrepreneurship Conference.
