

Hi everyone!  
I am Grecia Gutiérrez  
Rivasplata from Lima,  
Peru.

# OECl: Organization of Scientific education events

OECl is a company that arises from the need to find biology and veterinary training courses for students and young graduates who are just beginning their professional careers. We offer affordable and high quality education.

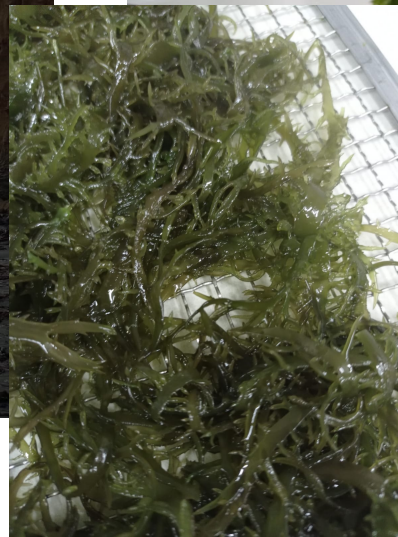

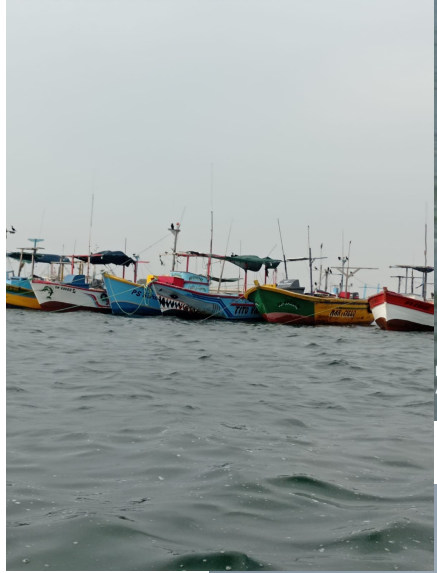

# Laboratory of Seaweeds (CEPPA)

- On the other hand, I work in the laboratory called CEPPA, which is located next to the Paracas National Reserve (Peru), where we investigate seaweed and its sustainable use for human consumption. Our main objective is to work with the community to seek new economic income and conserve natural resources.
